See You at Oshkosh!

KIRKLAND, Wash. (July 2021) – This year’s EAA AirVenture in Oshkosh is back! Icom America is thrilled to see everyone in person again and to show off our lineup of trusted avionic radios. We will be located in **Booth 2027**, from July 26th through August 1st, 2021.

On display this year will be our popular A25N Bluetooth® handheld (NAV & COM) and A220 panel-mount transceiver radios. The A25N is a powerful air band radio that has built-in GPS and Bluetooth® for hands-free operation. In addition, this radio comes packed with navigation functions like Simplified Waypoint NAV, the ability to create flight plans via iOS® and Android™ app for radio import via Bluetooth®, and VOR indicators. Other features include FLIP-FLOP channel recall button, priority watch, and weather channels.

If a panel mount is what you are looking for, the A220 is the perfect radio for experimental to sport pilots. With the brightest OLED display on the market, view with higher contrast and a wider viewing angle with faster response time than conventional LCDs. Large switch buttons and an easy-to-spot FLIP-FLOP button ensure everything is clear and convenient. Additional features include a voice-activated intercom function, automatic weather channel spacing, Dualwatch, priority watch, and a slim physical profile. At 34mm in height, it can fit where panel space is limited. An FAA TSO-approved version is also available.

AIR. LAND. SEA.

Swing by our booth to check out our suite of popular Bluetooth®-enabled avionic radios. If you buy a new A220 or A220 TSO-approved version at the show, bring your proof of purchase to the Icom booth and receive a special gift: an Icom microfiber towel and kneeling pad! See an authorized Icom dealer for details.

ADD BEFORE FLIGHT.
